1. Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-26, drawn to an optical transducer and an optical system using that transducer, classified in class 356, subclass 371.
- II. Claims 27-30, drawn to an embossing device, classified in class 72, subclass 462.

2. Inventions I and II are unrelated. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different modes of operation, different functions, or different effects (MPEP § 806.04, MPEP § 808.01). In the instant case the transducer used in invention I need not be made with by the tool of invention II and the tool of invention II may be used to make embossed objects other than the transducer used in invention I. There is no relationship between the embossing tool of intention II and the optical measurement made by invention I; the fact that a portion of the measurement instrument of invention II may, but need not be, made by the tool of invention II, does not establish a relationship between the two for patentability determination purposes.

3. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, the

search required for Group I is not required for Group II, the two have separate status in the art because of their divergent subject matter requiring separate consideration of separate and different issues for examination, restriction for examination purposes as indicated is proper.

4. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even if the requirement be traversed (37 CFR 1.143).

5. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(I).

6. Papers related to this application may be submitted to Group 2800 by facsimile transmission. The faxing of such papers must conform to the notice published in the Official Gazette, 1096 OG 30 (15 November 1989). The fax number is (703) 308-7722.
